Artist Statement

Quincy Jones once said "there are two things people cannot live without. Water and music". Music is all around us and there hasn't been a day I haven't heard music at least once. For example, I hear music in the car radio, waiting rooms, on the phone while being put on hold, and outside while walking on the sidewalk. Just like music, I also see paintings. From graffiti on the streets, or even how a tree is bent to look like a figure. Another form of art is video. When you see a commercial on TV, a movie, and especially when watching Bugs Bunny cartoons.

Music, paintings, and videos are all related because they represent freedom of expression and diversity. I am a media developer. I create music when DJing an event. I play a large diversity of music to help uplift my audience. I create different logos, videos, and photography for clients to use to express their business. I show freedom of creativity and diversity through my art.
